EDUCATION

Vidya Jyothi Institute of Technology (VJIT)
B.Tech in Information Technology, CGPA: 8.44/10

Hyderabad, Telangana
Expected Jun 2026

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS

Frontend: React, Next.js, Redux, Context API, Tailwind CSS, Material-UI, Responsive Design

Backend: Node.js, Express.js, NestJS, REST API Design, JWT/OAuth Authentication

AI/Systems: LangChain, LangGraph, OpenAI API, Prompt Engineering, RAG, pgvector

Databases: PostgreSQL, MongoDB, Prisma ORM, Query Optimization, Elasticsearch

DevOps/Tools: Git, GitHub Actions, CI/CD, Docker, Vercel, Railway, AWS (EC2, S3), Jest, Postman

PROFESSIONAL EXPERIENCE

Glow Tech Solutions

Hyderabad, Telangana

Software Engineer (Full-Stack Development Intern)

Dec 2024 – Mar 2025

- Architected scalable backend services using Node.js, Express.js, and REST APIs handling 500+ daily active users; optimized MongoDB queries using indexing and aggregation pipelines reducing latency by 45%
- Developed responsive React and Next.js frontend applications with TypeScript, improving performance by 40% through code splitting, lazy loading, and CSS optimizations achieving 95+ Lighthouse scores
- Established CI/CD pipelines using GitHub Actions and Docker, reducing deployment time by 30%; implemented comprehensive unit and integration tests with 90%+ code coverage
- Shipped 8+ features across 3 releases using Agile methodology in fast-paced startup environment

Intrinsic Science Labs

Hyderabad, Telangana

Software Engineer (Full-Stack Development Intern)

Sep 2024 – Dec 2024

- Developed reusable React components using modern patterns and hooks with 90%+ code coverage using Jest and React Testing Library; reduced development time by 25% across 3+ projects
- Implemented state management with Redux, integrated RESTful APIs with proper error handling and loading states
- Built backend services using NestJS with modular architecture, controllers, services, and middleware; implemented dependency injection for scalability

KEY PROJECTS

InboxSync – AI-Powered Email Management SaaS | *Node.js, TypeScript, React, PostgreSQL, OpenAI* | [GitHub](#)

- Built full-stack production SaaS platform enabling real-time multi-account email management with sub-1-second IMAP sync processing 10,000+ emails daily with 96%+ uptime
- Implemented RAG pipeline storing training emails as pgvector embeddings and performing vector similarity search to generate AI-powered personalized email replies achieving 85% suggestion acceptance rate
- Designed multi-tenant backend with OAuth authentication (Gmail/Outlook), automatic categorization using GPT-4o-mini into 5 business categories with 92% accuracy
- Developed Elasticsearch indexing enabling sub-50ms full-text queries; optimized database queries reducing latency by 40% and implemented API response caching reducing redundant LLM calls by 60%

Syntra AI Agentic Assistant – LLM-Powered Autonomous Platform | *Next.js, LangChain, IBM Watson, Node.js* | [GitHub](#)

- Built full-stack system integrating large language models into production web platform handling 500+ autonomous workflows/month with sub-200ms response latency
- Architected Node.js backend using LangChain for LLM orchestration with agentic task execution framework; integrated IBM Watson NLP for natural language understanding
- Designed serverless Next.js frontend with Clerk authentication and RBAC; implemented real-time status updates using WebSockets
- Optimized inference latency through prompt caching and result memoization; implemented exponential backoff retry logic for LLM API calls

ACHIEVEMENTS & RECOGNITION

- Smart India Hackathon 2025 Waitlisted** – Top 5000+ teams nationally; demonstrated system design, ML integration, and real-world problem-solving for government use case
- Technical Leadership** – Lead TEDXVJIT technical team for 2025; mentored junior developers on full-stack development and best practices
- Built systems serving 1,000+ concurrent users; optimized performance by 40% (frontend), 45% (database), and 60% (API caching) across multiple production projects
